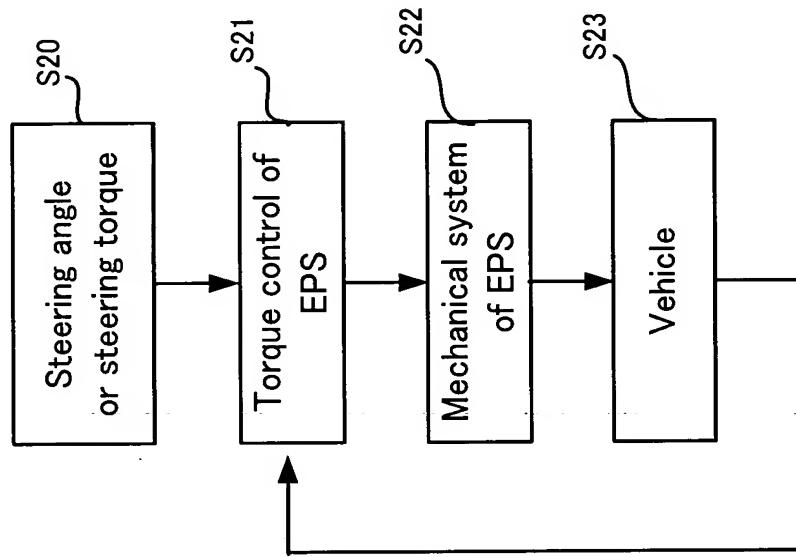

FIG.6

300

Simulation controller calls sub-routines, and thereby controlling entire procedure. Contents of the following portions are included:

- ① maneuver
- ② simulation
- ③ data to be produced
- ④ store a result in a readable common file

Interface converts a file of each of the analysis tools into a readable common file, and produces an index array which explains a variable sequence. The following conditions are satisfied:

- ① standardization of data definitions
- ② standardization of formats common
- ③ high speed communication of data
